

KB-VF INJECTION FORMULA

FOR USE IN DRAIN LINES

ADVANTAGES:

The multi-strains of microbes contained in BioStim's KB-VF freeze dried powder are designed to digest fats, oils, grease, starches, and sugars. KB-VF will control odors and buildup in plumbing lines that run from the three-compartment sink to the outdoor grease interceptor. KB-VF is used in conjunction with an automatic injection pump. It is not sensitive to wide temperature variations.

BIO FRIENDLY

NON-CAUSTIC
NON-PATHOGENIC
NO CHEMICALS, ENZYMES OR SURFACTANTS
100% MICROBIAL
NON-CORROSIVE
NON-FLAMMABLE
NON-TOXIC
SAFE TO USE IN ANY DRAIN

USAGE

Remove pump from bucket.
Mix with 5 gallons water in bucket.
Reattach pump to bucket; verify setting for pump.
Repeat monthly.

Environmentally safe formulations have always been a priority with BioStim. Our bioremediation services are performed with 100% non-pathogenic BioStim microbial products.
